About Sherritt

Sherritt is a world leader in using hydrometallurgical processes to mine and refine nickel and cobalt – metals deemed critical for the energy transition. Sherritt’s Moa Joint Venture has an estimated mine life of approximately 25 years and is advancing an expansion program focused on increasing annual mixed sulphide precipitate production by 20% of contained nickel and cobalt. The Corporation’s Power division, through its ownership in Energas S.A. (“Energas”), is the largest independent energy producer in Cuba with installed electrical generating capacity of 506 MW, representing approximately 10% of the national electrical generating capacity in Cuba. The Energas facilities are comprised of two combined cycle plants that produce low-cost electricity from one of the lowest carbon emitting sources of power in Cuba. Sherritt’s common shares are listed on the Toronto Stock Exchange under the symbol “S”.
