

**LME RFA**  
**AUDIT SUMMARY REPORT**

June 2024

## Background & Introduction

In 2019, the London Metal Exchange (LME) announced its responsible sourcing requirements following a formal market-wide consultation.

The requirements for all LME-registered brands are to:

1. Implement the OECD Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High Risk Areas (“OECD Guidance”) through track A, B or C or confirm secondary sourcing through track D.
2. Maintain an ISO 14001 environmental management system certification or equivalent.
3. Maintain an ISO 45001 occupational health and safety management system certification or equivalent.

For the third year since the LME’s responsible sourcing requirements entered into force, Sherritt, through the Metals Enterprise joint-venture (hereafter, the Producer) aims to comply with the above-mentioned requirement n.1, following the audited LME RFA track, also known as track B, with reference to calendar year 2023.
