About Sherritt

Sherritt is a world leader in using hydrometallurgical processes to mine and refine nickel and cobalt – metals deemed critical for the energy transition. Leveraging its technical expertise and decades of experience in critical minerals processing, Sherritt is committed to expanding domestic refining capacity and reducing reliance on foreign sources. The Corporation operates a strategically important refinery in Alberta, Canada, recognized as the only significant cobalt refinery and one of just three nickel refineries in North America. Sherritt’s Moa Joint Venture produces cost competitive critical minerals while maintaining high sustainability standards and has an estimated mine life of approximately 25 years.

The Corporation’s Power division, through its ownership in Energas, is the largest independent energy producer in Cuba, processing domestically sourced raw natural gas to generate electricity for sale to the Cuban national electrical grid. Sherritt’s common shares are listed on the Toronto Stock Exchange under the symbol “S”.
